

Dear colleagues!

We cordially invite you to participate in the International Scientific Conference "**Kyiv Conference on Analytical Chemistry – 2026**". The conference brings together chemists from Ukraine and around the world whose scientific work is related to chemical analysis, as well as to the development, characterization, and application of new materials, both for analytical purposes and for addressing important challenges in chemistry, physics, biology, medicine, pharmacology, ecology, materials science, technology, and other fields.

The aim of the conference is to provide a platform for the discussion of important theoretical and applied issues related to modern analytical chemistry, its interconnections with other areas of chemistry and related disciplines; as well as for the exchange of experience and the development of collaboration among researchers, academics, postgraduate students, and representatives of industry and business. The conference will be of interest to those wishing to stay up to date with recent advances and best practices in chemical analysis.

Dates: **October 21–23, 2026.**

Due to the security situation in Kyiv, the conference is planned to be held in an **online format**.

The topics of the conference

New materials and reagents and prospects for their application in chemical analysis and other fields of science

Methods of sample preparation, preconcentration, and separation

Instrumental methods of analysis in chemistry, chemical technology and other fields of science

Bioanalytical and pharmaceutical chemistry, pharmaceutical analysis

Nano- and supramolecular chemistry: challenges for analytical chemistry

Out-of-laboratory analysis. Sensor systems: from development to application

Challenges in environmental analysis

Quality control. Statistical methods and artificial intelligence in chemistry

For more information please contact:

Anastasia Mosendz
(organization)

Please share the information on the conference with your colleagues and anyone else who may be interested in participating.

With best regards,
Organizing Committee
KCAC – 2026

Types of participation:

- speaker (oral presentation – plenary/sectional and publication of abstracts in the conference proceedings);
- poster presenter (publication of abstracts in the conference proceedings);
- listener (without presentation; registration on the conference website is mandatory);
- remote participation (publication of abstracts in the conference proceedings).

**Official languages of the conference:
English and Ukrainian.**

Abstracts are recommended
to be prepared in English.

**Deadline for the registration and
submission of the abstracts is
10.10.2026.**

All registered participants will be invited to submit a manuscript to the journal “**Methods and Objects of Chemical Analysis**”. Successfully peer-reviewed manuscripts will be published in the current issue. The journal is indexed in databases such as Scopus, Web of Science, SciFinder, EBSCO and others:

Journal website :

<https://www.moca.net.ua/index.html>

Abstract submission guidelines are
available on the conference website:

<https://kcacmt.univ.kiev.ua/en>

Abstracts and participant registration forms can be submitted online via the conference website or by e-mail: kcacmt@ukr.net

All abstracts submitted to the conference will be reviewed and checked for signs of academic plagiarism and other violations of academic integrity, as defined by Ukrainian regulatory acts, as well as international documents (COPE, Codes of Academic Integrity, ETINED materials).

Other information will be announced in the second information letter and on the conference website at the end of June 2026:

<https://kcacmt.univ.kiev.ua/en>
